15th INTERNATIONAL TRANSCATHETER INTERVENTION COURSE
Coronary, Peripheral, Imaging, Physiology, Robotics and Structural

February 8th & 9th, 2020

Venue:
NIRMÁ AUDITORIUM
Nirma University of Science & Technology
Sarkhej-Gandhinagar Highway, Ahmedabad-382481, Gujarat, INDIA.

FIRST ANNOUNCEMENT
Dear colleagues,

Thank you for your overwhelming response to TRICO. I am happy to announce that the year 2020 marks the 15th TRICO which will take place on 8th and 9th February, 2020.

This time, the course directors have decided to give different dimensions to TRICO by widening the horizons and including the imaging, physiology, robotics and structural interventions. Apart from discussing and demonstrating the intricacies of transradial approach, we are also going to discuss and demonstrate the utility of OCT, IVUS, FFR, RFR, rotational atherectomy and retrograde approach for CTO interventions. Live demonstrations by our team and accomplished international guest faculty members will address all the queries and confusions in respect to these technologies. There will be a few didactics on various subjects by the world authorities. There will also be an angio CD presentation session, when the invited delegates and international guest faculty will discuss their most challenging cases with our expert faculty members.

Our highly interactive format will allow beginners and experts alike to create and / or grow their respective programs effectively.

Hoping to see you at TRICO 2020.

Tejas Patel,
MD, DM, FCSI, FACC, FESC, FSCAI
Course Director
